**Abraham 'Steve' Colina**

(808) 745-5994 | stevetheprogramminglover@gmail.com | linkedin.com/in/abrahamstevecolina | stevecoder.com | github.com/steveweenie | San Antonio, TX

## SKILLS

**Languages:** Python, SQL, T-SQL, C#, VB.NET, PHP, TypeScript, JavaScript, Java, C/C++, PowerShell, HTML/CSS
**Frameworks & Libraries:** React, React Native, Next.js, Node.js, Spring Boot, .NET Framework, ASP.NET, FastAPI, Flask, Dash, jQuery, Bootstrap, Tailwind CSS, Expo, Godot
**Data & Cloud:** SQL Server, PostgreSQL, Supabase, Databricks, Airflow, Datadog, Power BI, DAX Studio, AWS, Azure
**Microsoft & Azure:** Azure DevOps, Microsoft Entra ID, Azure Identity, Azure Key Vault, Microsoft Graph API, Exchange, SharePoint, Teams, OneDrive, Windows Server, Microsoft 365
**Developer Tools:** Git, GitHub, Docker, Visual Studio, VS Code, NuGet, Jira, Freshworks, WordPress, Joomla, Stripe, Clerk, Figma, Adobe XD, Premiere Pro, Photoshop
**Concepts:** Version Control, REST APIs, CI/CD, ETL/Data Pipelines, Stored Procedures, Database Design, Row-Level Security, Webhooks, Design Systems, i18n, PWAs, RAG/LLM Integration, OOP, Full-Stack, IAM, Agile/Scrum, SDLC
**Certifications:** ESB, PCSB, Microsoft Office (Excel, Word, PowerPoint), IC3 Digital Literacy, HackerRank Python

## WORK EXPERIENCE

**Y&L Consulting (NSSA-NSCA): IT Application Developer / Support Engineer** **[Sep 2026 - Present]**
*VB.NET, C#, PHP, SQL Server, T-SQL, Azure, Git* *San Antonio, TX*
- Develop and maintain VB.NET, C#, and PHP applications for a nonprofit serving **15,000 members** and **700+ clubs**
- Write SQL Server stored procedures, views, and queries backing national competition results and member data
- Support Azure modernization of the legacy PHP and WordPress platform under the IT Data Engineer

**Thrivent Financial: Associate Software Developer Intern** **[May 2026 - Aug 2026]**
*Python, SQL, Databricks (AWS), Power BI, DAX Studio, Dash, Airflow, Jira* *San Antonio, TX*
- Rebuilt the legacy EDP job monitoring dashboard, migrating it from Power BI to a custom Databricks Dash app by reverse-engineering its SQL with DAX Studio; shipped MVP in **2 weeks**, grew to **30+ users** across DEME
- Built a Datadog-to-Databricks ingestion path into the data marketplace, surfacing website clickstream telemetry that had not been available to downstream AI and analytics teams
- Automated ingestion of Accounts Under Management data covering **hundreds of millions** in assets, replacing a manual email-to-spreadsheet process
- Reduced pipeline duplication by designing reusable datasets supporting **50+ downstream analysts and advisors**

**Atlantic Records: Contract Web Designer** **[Aug 2026 - Sep 2026]**
*Figma (Variables, Variants, Auto Layout, Dev Mode), Git* *Remote*
- Designed official site for an Atlantic Records artist, emptyshellcasing.com, owning visual direction through the Figma handoff consumed by Atlantic's in-house dev team across **24 versioned releases**
- Built **135 root components** with states as variants and **15 frames** across **3 breakpoints**

**AssetWorks, Inc.: Software Developer Intern** **[Jan 2026 - Apr 2026]**
*React Native, TypeScript, SQL, Git, Jira, Figma* *San Antonio, TX*
- Shipped features and customer-reported bug fixes to Go: Work Management and Go: Asset Management, published apps used by **150+ universities,** rebuilt in React Native and TypeScript for iOS and Android
- Built a Grainger API catalog integration adding an in-app ordering tab, so technicians purchase parts against a work order or asset without leaving the app and every purchase is documented on the record

**Aloha Table Tennis Association: Head of Technology (Volunteer)** **[Jan 2026 - Present]**
*Next.js, React, TypeScript, PostgreSQL, Supabase, Stripe, Clerk, Vercel* *Remote*
- Led web development of alohatabletennis.org and maintain the full-stack platform for a 501(c)(3) club serving **200+ users** and **50-70 paying monthly members**, spanning **43 pages** and **69 API route handlers**
- Designed a **38-table** Postgres schema across **93 migrations** with default-deny row-level security, append-only financial ledgers, and advisory locks preventing double-booked tournament seats and coaching slots

## PROJECTS

**TAT Trick** | React, TypeScript, Python, FastAPI, AWS, Figma **[Jul 2026]**
- **1st place** of **26 teams** and **122 participants** at Internal Thrivent's Hackapalooza '26, advancing from **top 5**
- Built the React and TypeScript frontend for the gamification leaderboard and impact metrics page, wiring live Action Teams data and a RAG-based AI chatbot through a Python and FastAPI layer

**Fidgi** | Java, Spring Boot, React, PostgreSQL, Supabase, Clerk, Stripe **[Aug 2025 - Dec 2025]**
- Built the Java and Spring Boot backend and REST APIs for a full-stack e-commerce store with admin panels
- Integrated Clerk authentication, Stripe payments, and Supabase PostgreSQL; contributed to the React user interface

**Mad Hatter's Whisper ML NLP** | React Native, Flask, SVM, Naïve Bayes, Expo **[May 2025]**
- **1st Place**, 2025 Code Quantum Hackathon winner with a **4-person** cross-functional team
- Built a mobile app returning real-time character predictions from dialogue using SVM, Naïve Bayes, and TF-IDF

**Undead Presidents** | GDScript, Python, Git **[Aug 2024 - Present]**
- Developing a split-screen survival shooter for Steam with **8-player** peer-to-peer multiplayer and **44,000+ impressions**

## EDUCATION

**University of Texas at San Antonio** | B.S. Computer Science, 3.79 GPA, Dean's List Aug 2023 - May 2027
**Coursework:** Data Structures and Algorithms, Database Systems, Cloud Computing, User Interfaces, Web Technologies
**Organizations:** ACM, ICPC Coding Club, Rowdy Creators, UTSA Bold Scholars, SHPE, VOICES, NTHS Secretary
